About me

I am learning about Computer Science subjects for a third year now. Currently, I am a third year undergraduate at Jagiellonian University's FAIS faculty, looking forward to engage in professional software development.

I have high hopes regarding software development, because I believe this is what is best start for my career. I would love to learn practical skills and gain some actual programming working experience. I am excited about finding job that suits my character and potential. I will gladly start off as an Junior Developer in your company.

Experience

At the moment my experience is strictly academical. I have done exercises, projects and tests that broadened my general IT knowledge, made me familiar with algorithms and data structures, and guided me in learning how to code. I have placed some of the previous projects on GitHub (link in additional information), which I invite you to check out.

Education

2018 - current	Computer Science at Jagiellonian University's Faculty of Physics, Astronomy and Applied Computer Science in Cracow
----------------	--

Abilities

- Basic knowledge of C, C++, Java, HTML, CSS, JavaScript
- Basic skill in SQL and basic knowledge of Git
- Basic knowledge of algorithms and data structures
- Basic bash skill
