About me

I am learning about Computer Science for a third year now. Currently, I am a third year student at Jagiellonian University's FAIS faculty, looking forward to engage in professional software development. I am most interested in web development, yet I think about working with databases as well.

In my free time I attend online courses and small programming projects. I hope to learn swiftly, and to join professional team that creates valueable software.

I would love to learn practical skills and gain some actual working experience. I am excited about finding job that suits my character and potential.

Experience

At the moment most of my experience origins from my academical activity. I have done exercises, projects and tests during my university courses. I also attended The Complete 2020 Web Development Bootcamp of Udemy. I have placed several of my projects on my GitHub repository (link in additional information), which I invite you to check out :)

Education

2018 - current	Computer Science at Jagiellonian University's Faculty of Physics, Astronomy and Applied Computer Science in Cracow.
2013 - 2016	VI LO im. Juliusza Słowackiego in Kielce

Abilities

• Elementary knowledge of C, C++, Java, Python, HTML5, CSS3, JavaScript technologies

• Basic skills of Git, as well as SQL systems and MongoDB

• Basic Linux knowledge, basic knowledge of LAN architecture

• Finished academic maths, logic, algorithms and data structures courses

• Native polish speaker, advanced english language skill
